

Preserved Moss

Nature **Indoors** Without Maintenance

What is Preserved Moss?

Preserved moss is real moss that has been treated to stay fresh and soft for a long time. It does not need sunlight, water, or soil to stay green. People use it for decoration, like on walls, in pots, or in art projects. It looks like live moss but is very easy to care for.

Preserved Moss are:-

- Natural moss harvested and preserved to maintain its soft, vibrant look.
- Treated with eco-friendly solutions to replace natural sap with a preservative.
- Does not require soil, sunlight, or watering.

How does it works?

Preserved moss isn't alive anymore, but thanks to preservation, it looks and feels alive while being completely maintenance-free. It works like:

- Preservation process halts growth but retains appearance and texture.
- Lightweight & Flexible Design
- Extremely light and easy to install — adapts to any wall shape without structural stress.
- Vibrant & Versatile
- Available in a range of colors and textures, allowing creative freedom in interior styling.
- Acts as a natural sound absorber and air purifier.
- Brings aesthetic charm and acoustic comfort to your space.
- Remains fresh-looking for 8–10 years or more.
- The moss absorbs moisture from the air (humidity), which keeps it soft and vibrant. If the air is too dry, it may harden slightly, but it won't die or decay.

Preservation Process

Natural moss is carefully collected from forests or controlled farms.

Only mature moss is harvested, ensuring sustainability.

Instead of drying, the moss is treated with a special eco-friendly solution.

The natural sap is replaced with a glycerin-based solution.

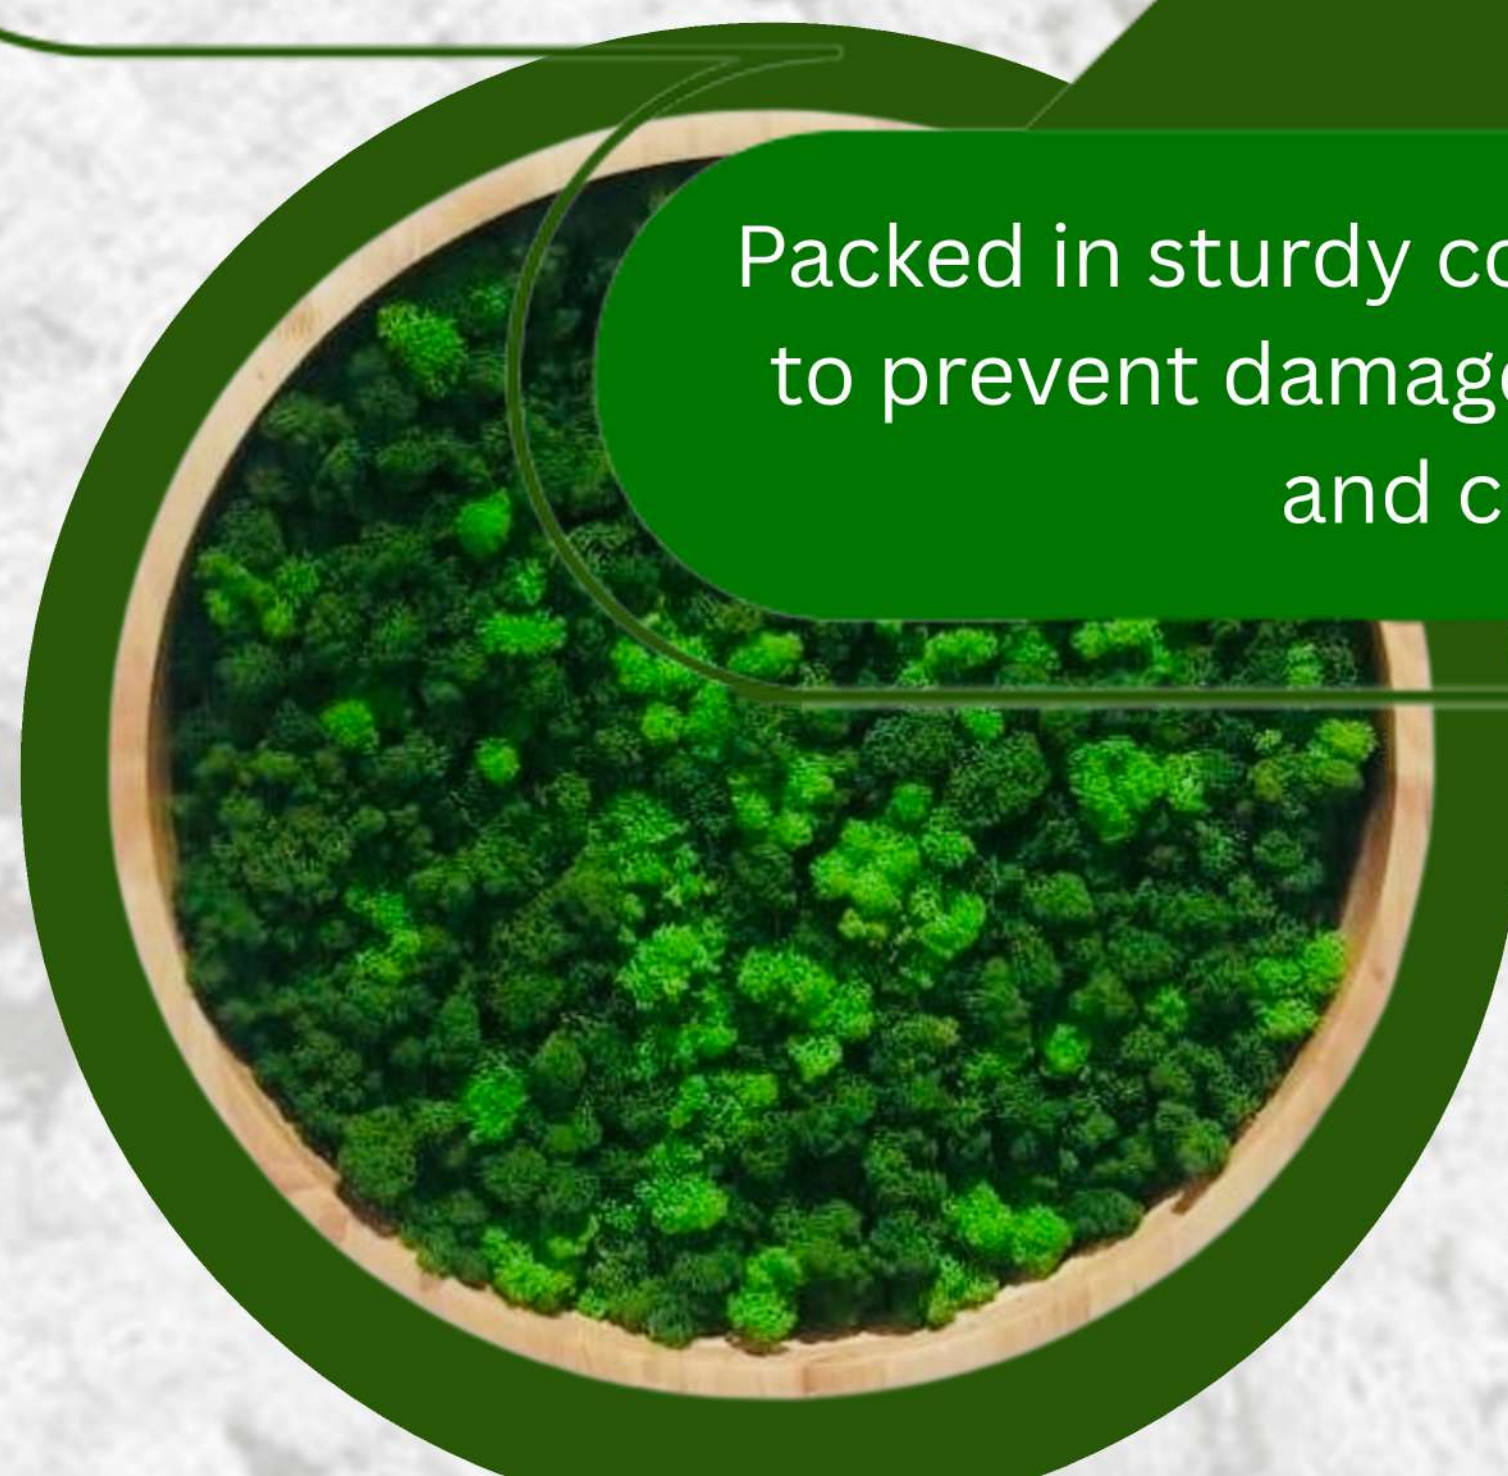

The preservation halts growth but keeps the moss soft, flexible, and fresh-looking.

Natural pigments or dyes are added to maintain its vibrant green shades.

The moss absorbs moisture from the air (humidity), which keeps it soft and vibrant.

Packed in sturdy corrugated boxes with cushioning to prevent damage and protect softness, texture, and color during transit.

Where to Use Preserved Moss Walls?

Preserved moss can be used to create moss walls, enhance interior design, add texture to terrariums, and feature in floral arrangements. We commonly use it :-

- **Residential Spaces:** Living rooms, bedrooms, home offices.
- **Commercial Spaces:** Offices, Hotels, Restaurants, and Retail shops.
- **Wellness Areas:** Spas, yoga studios, meditation rooms.
- **Event Decor:** Exhibitions, weddings, conferences.

Type of Preserved Moss

1. Moss Panel

2. Reindeer Moss

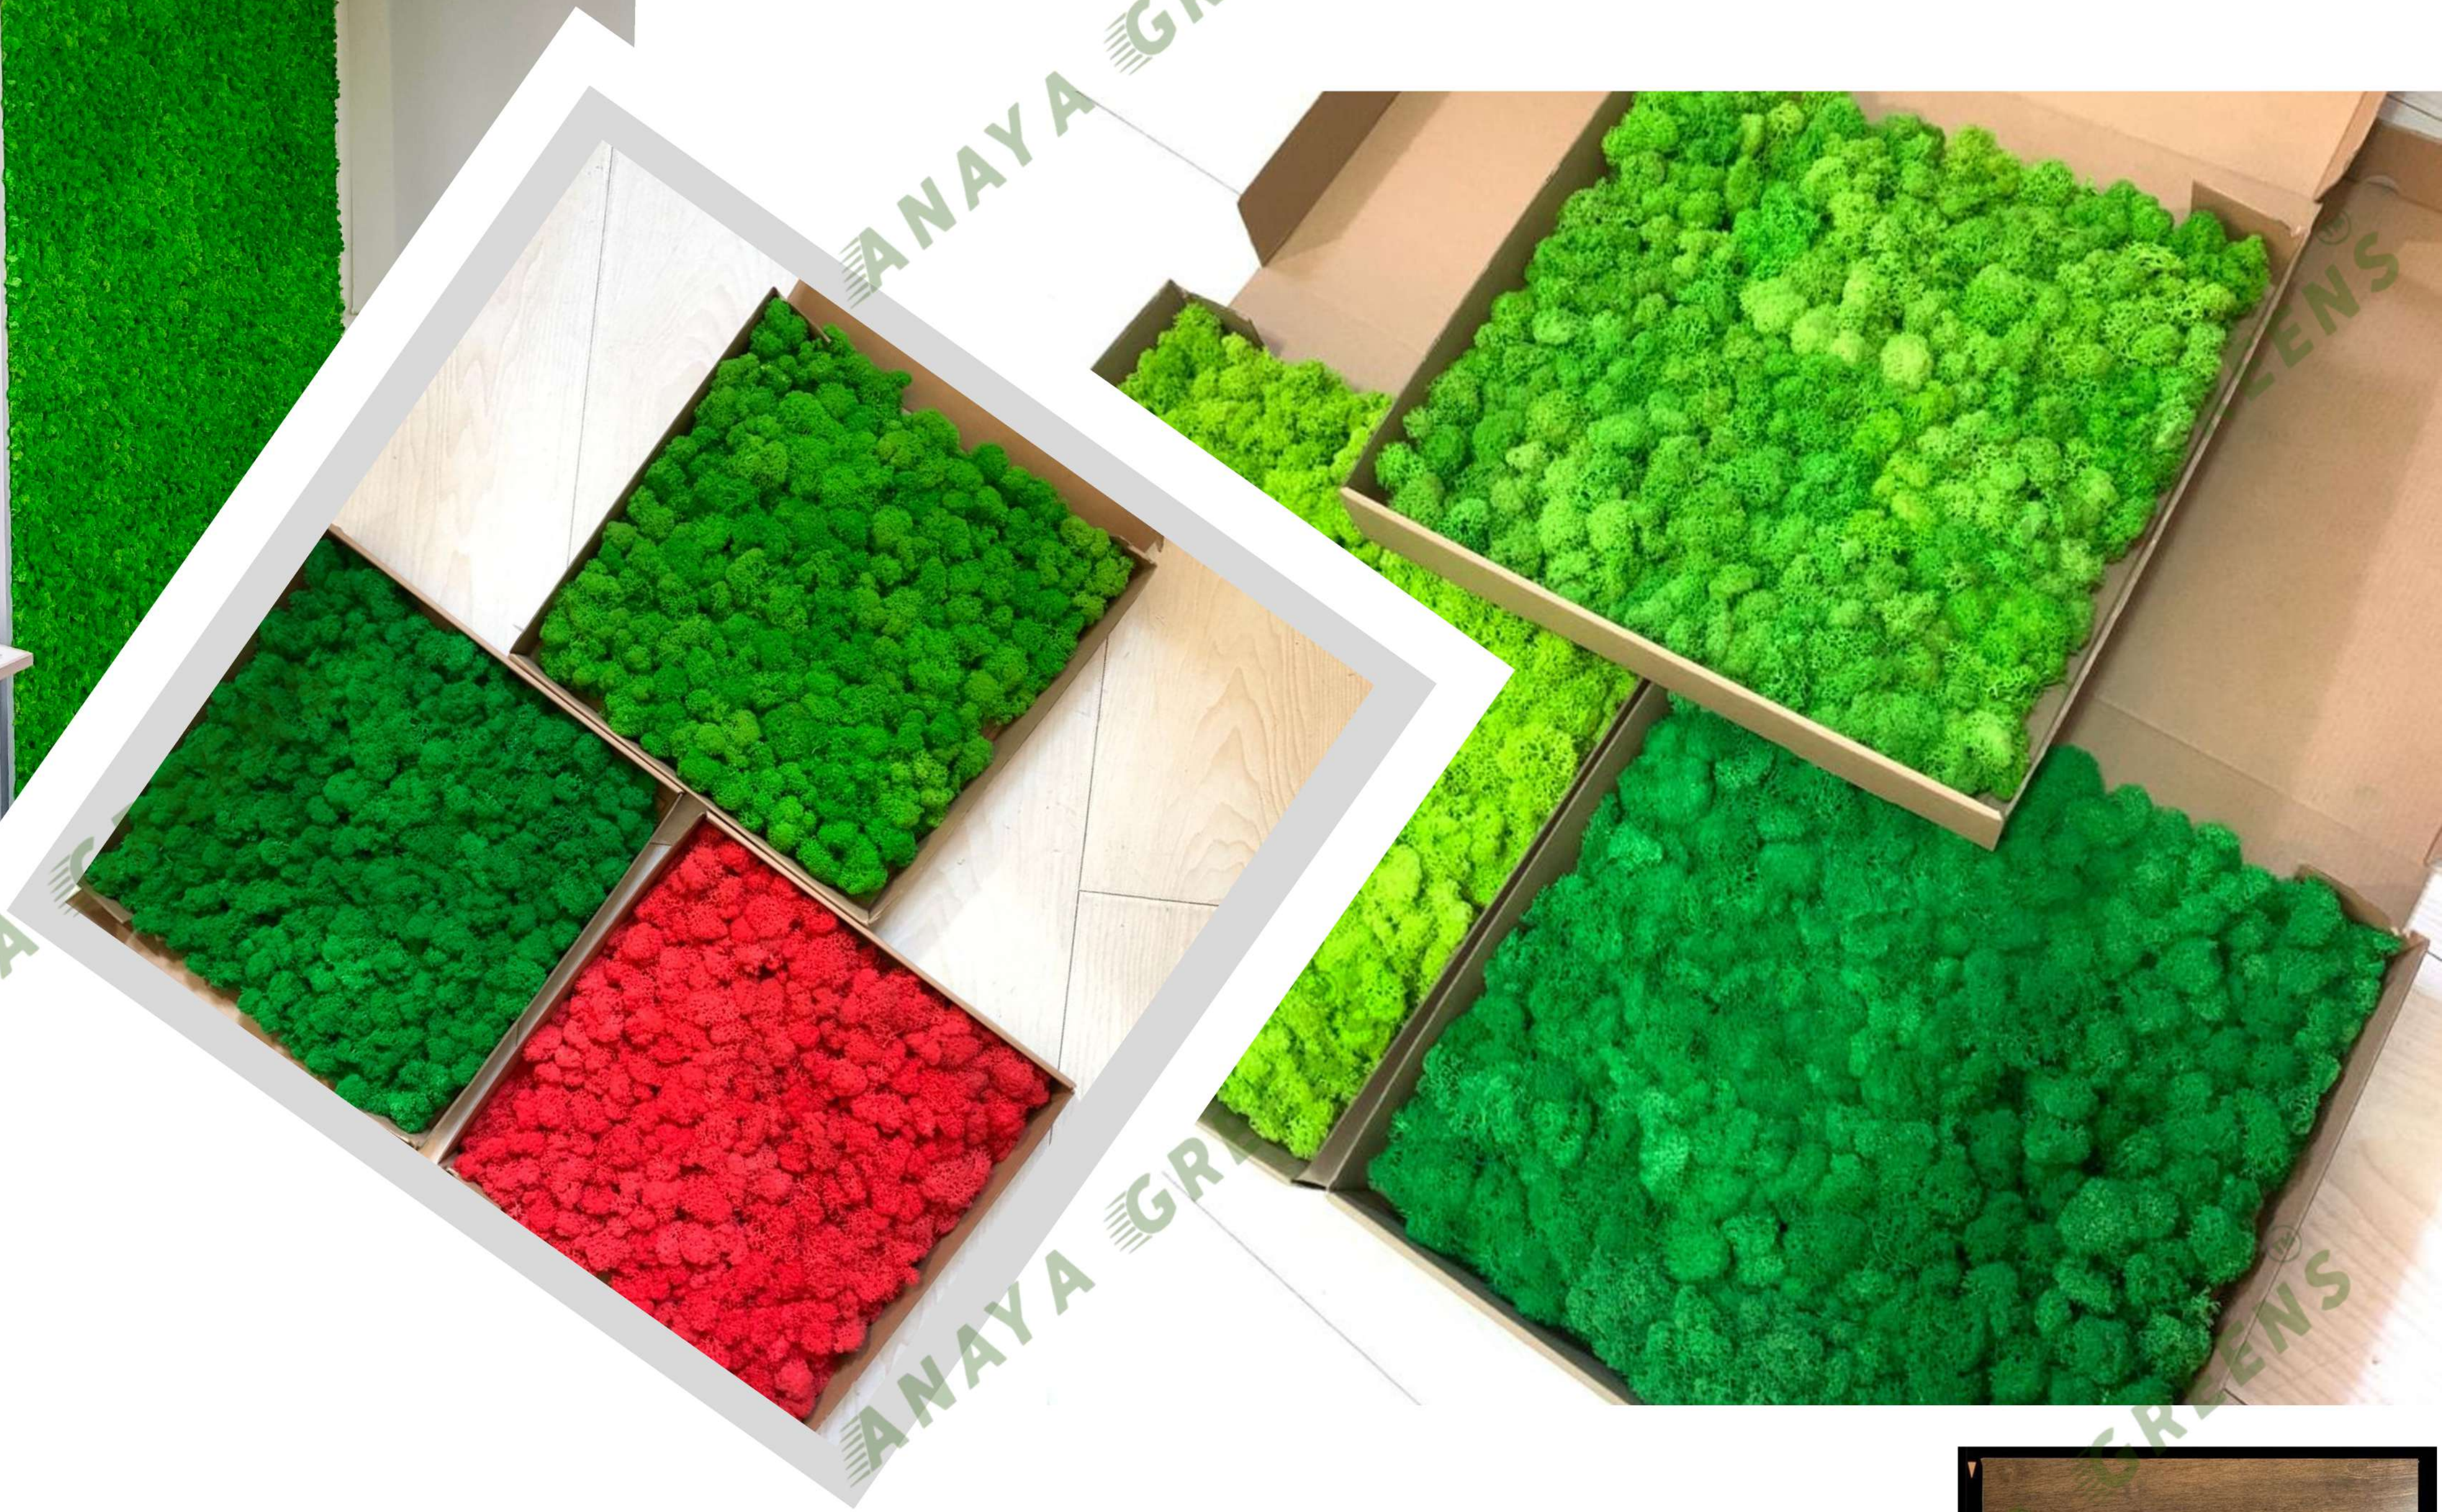

3. Flat Moss

4. Pole Moss

1. Moss Panel/Tile

- Panel moss: Reindeer moss is carefully fixed onto a base made of MDF and polyester fiberboard using hot-melt adhesive. This ensures it stays securely in place while meeting the B1 flame-retardant safety standard. The installation is both strong and safe.
- Simply peel off the back adhesive sheet and paste directly on the wall or plywood surface.
- It is designed for fast project execution.

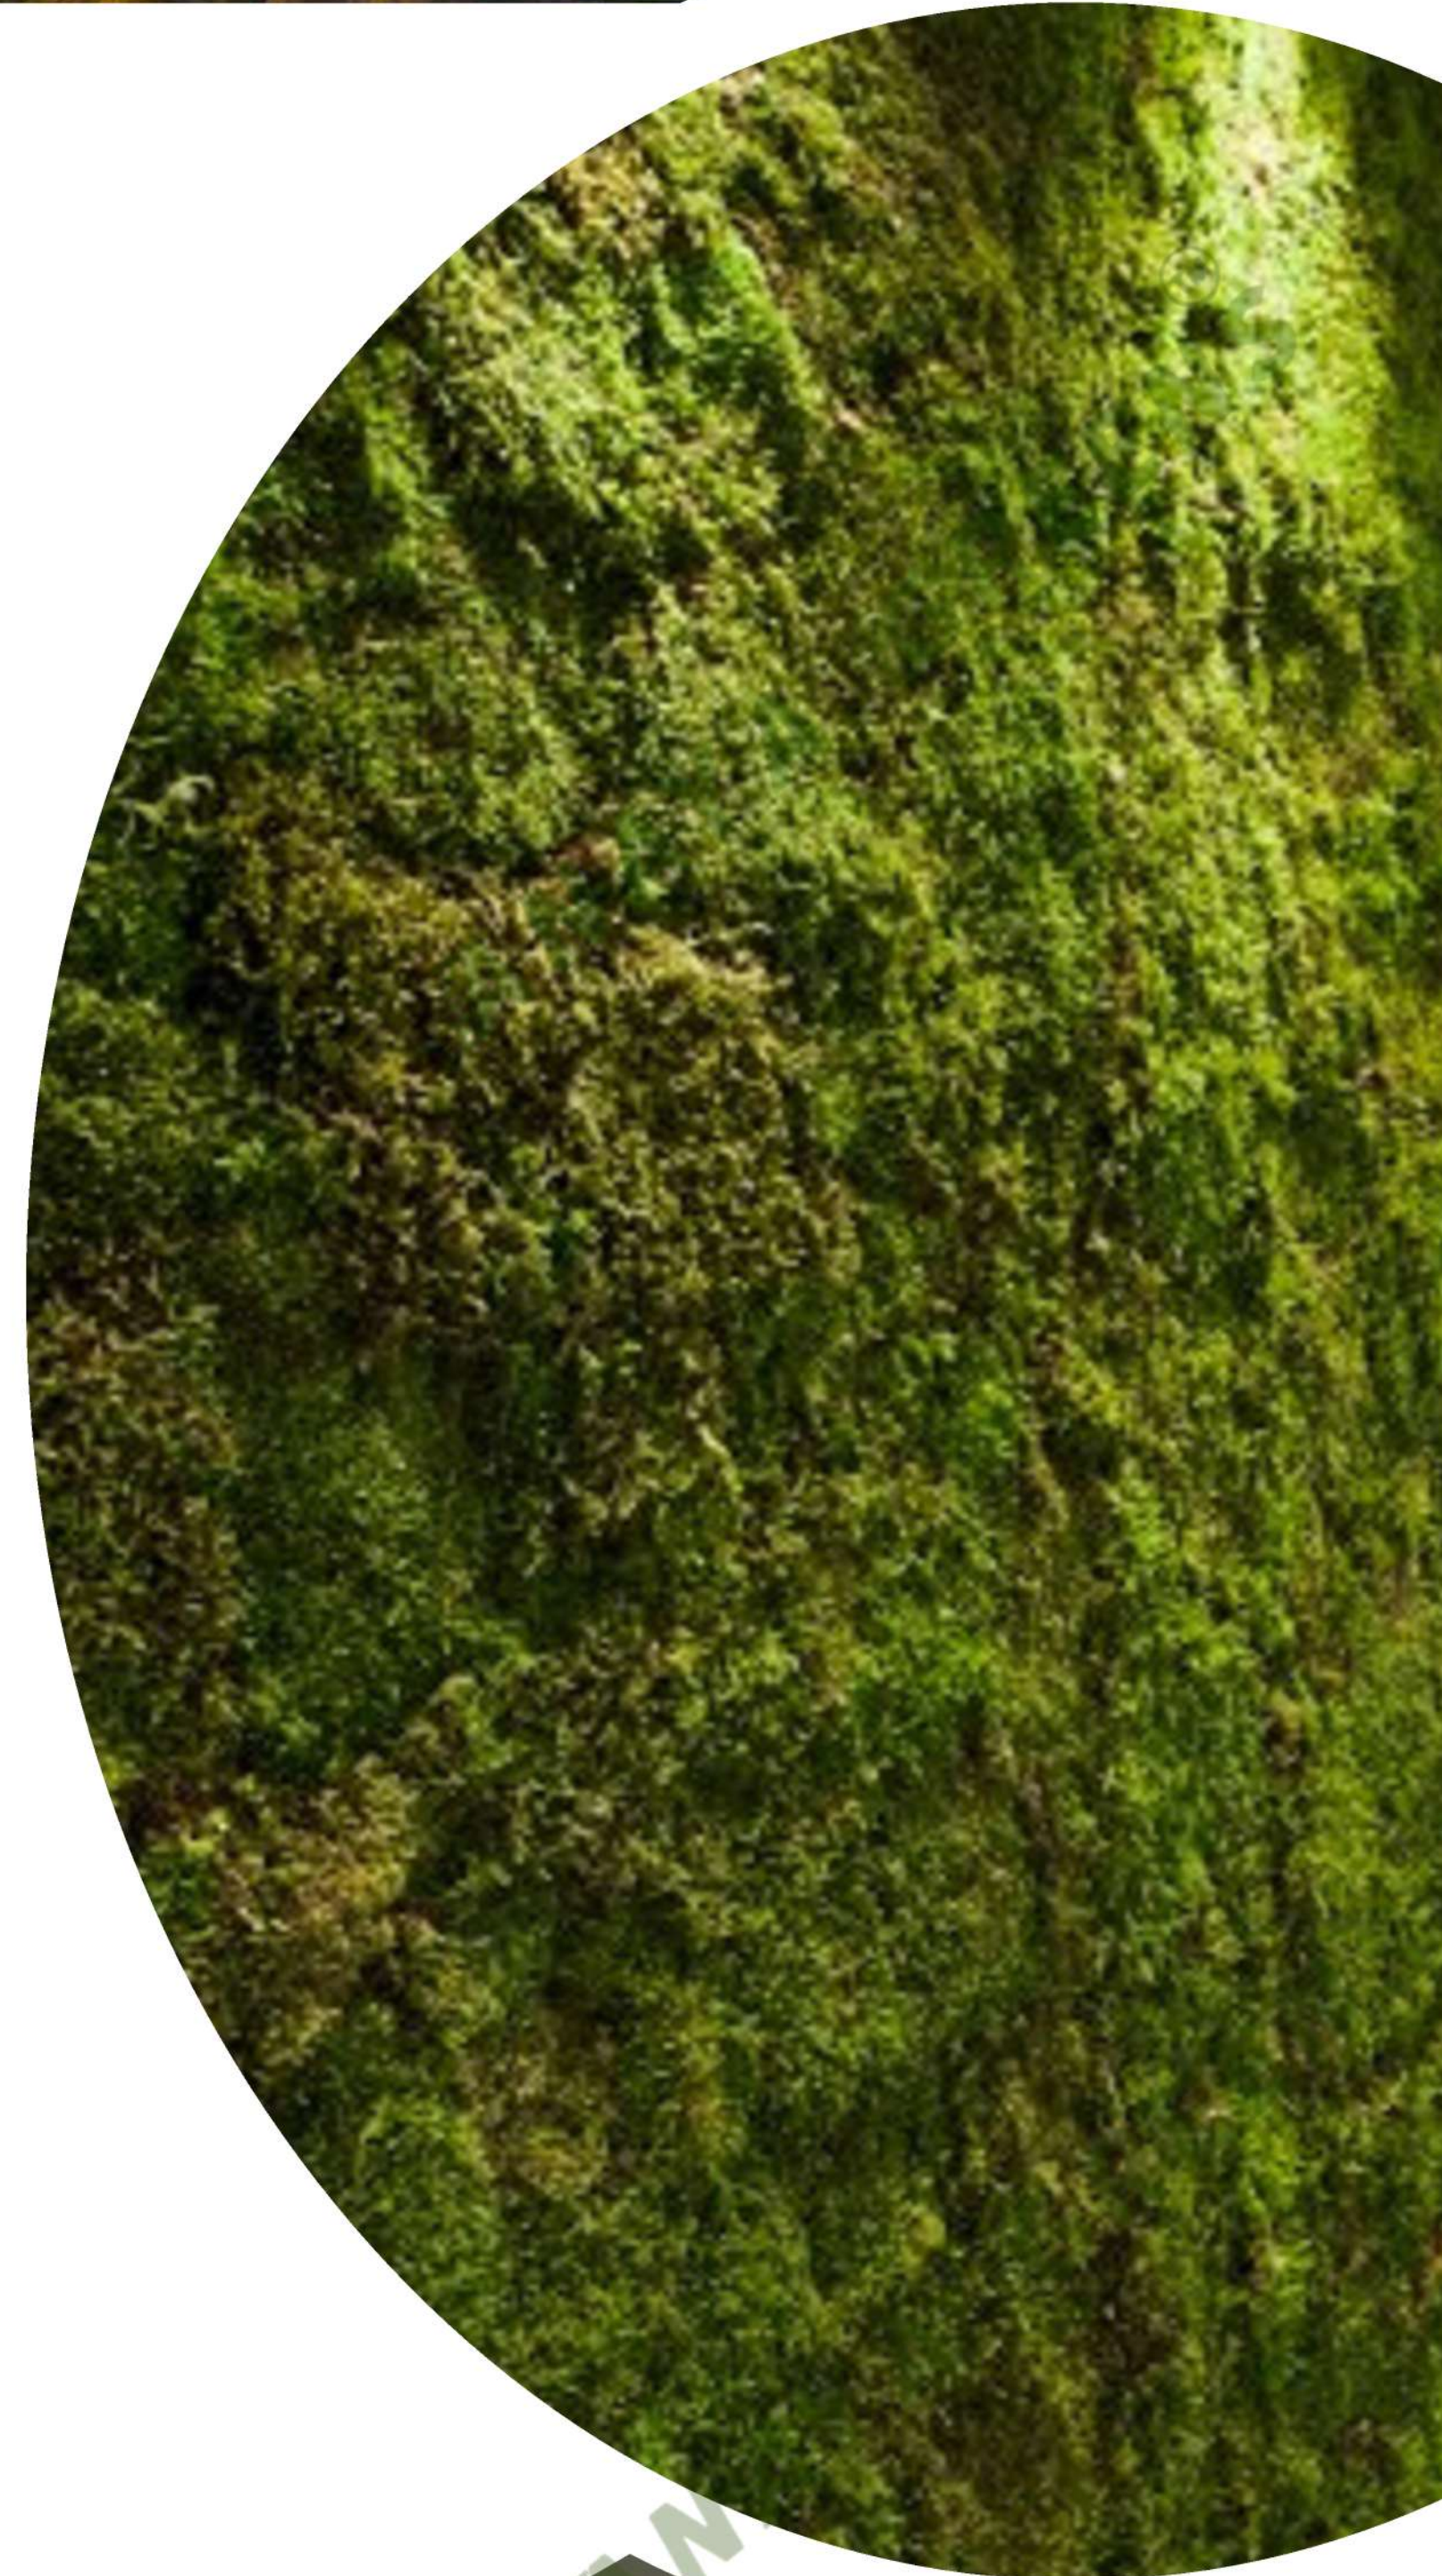

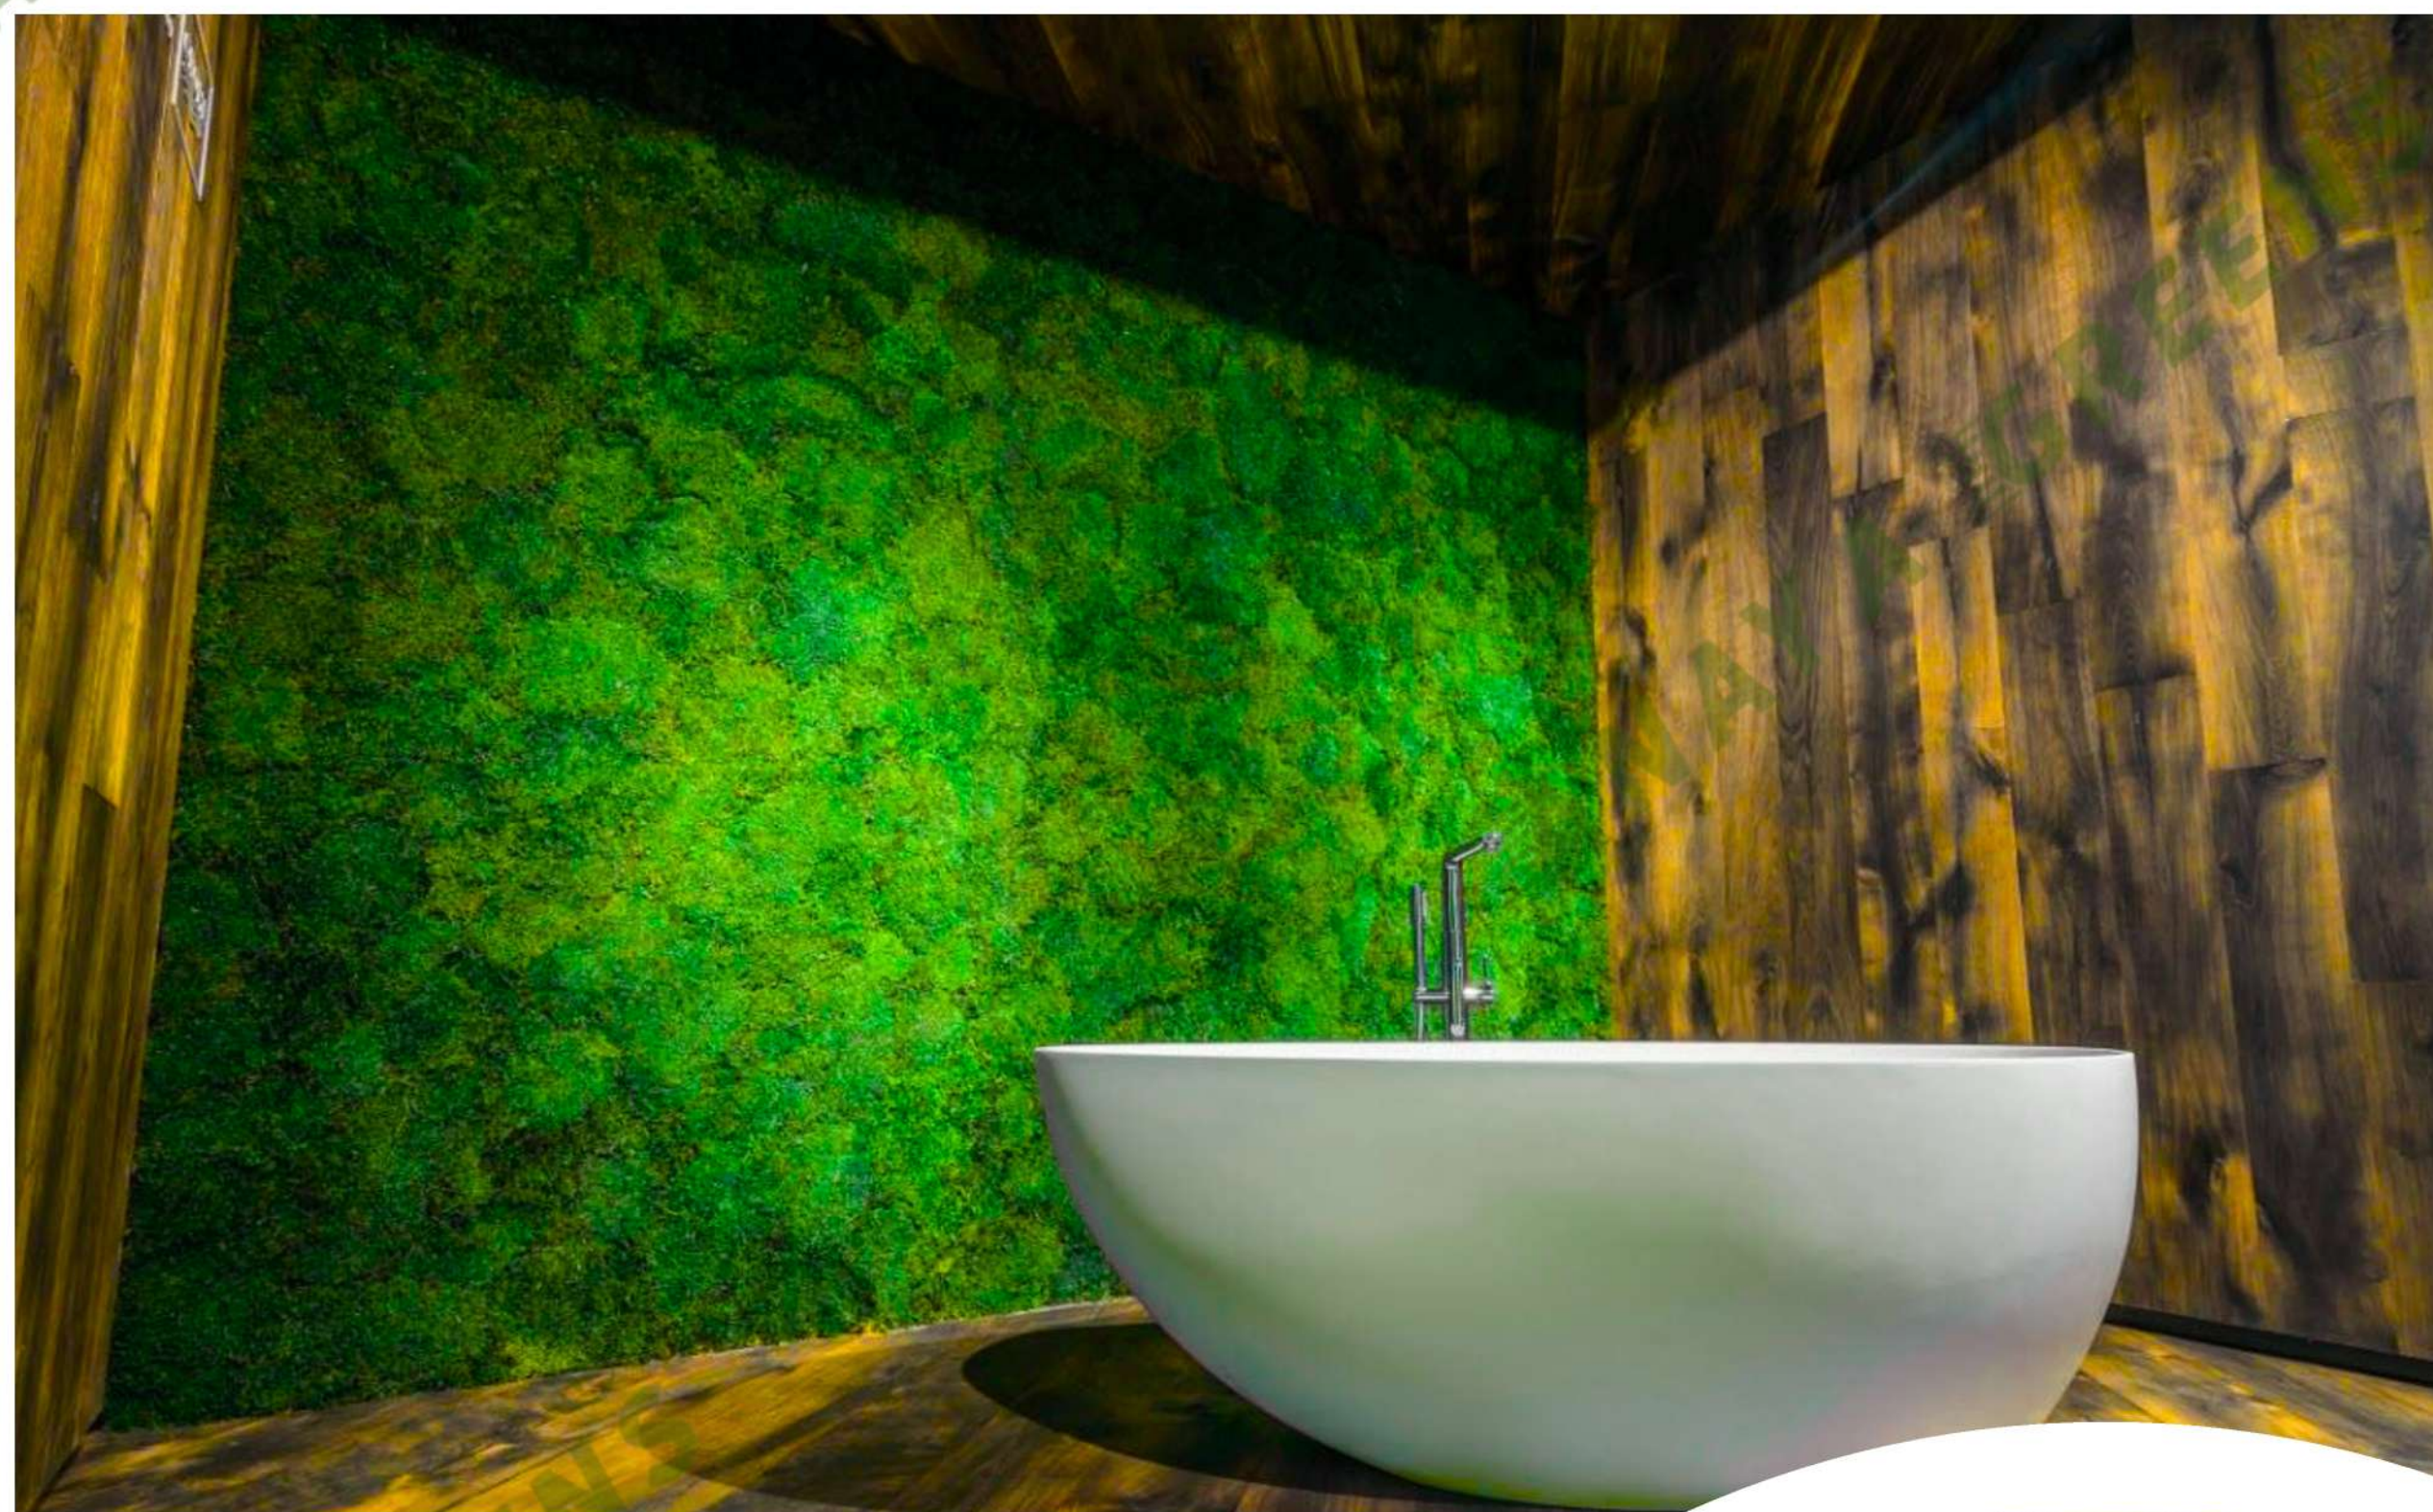

2. Reindeer Moss

- Reindeer moss is comes in loose form and It is Known for its versatility, it is widely used in moss walls, decorative panels, and artistic installations.
- The moss is carefully fixed onto a plywood or MDF base using hot-melt adhesive, ensuring a secure and long-lasting hold.
- Its lightweight and flexible nature makes it easy to shape into patterns, logos, or customized designs, while its wide range of color options allows endless possibilities for personalization.

3. Flat Moss/Sheet Moss

Sheet moss, also known as flat moss, is a preserved variety with a smooth, carpet-like texture, making it perfect for covering large surfaces and backgrounds. It is commonly used as a base layer in green walls, moss art, and decorative panels, offering a rich green tone and a natural foundation for creative designs.

4. Pole Moss/Cushion Moss

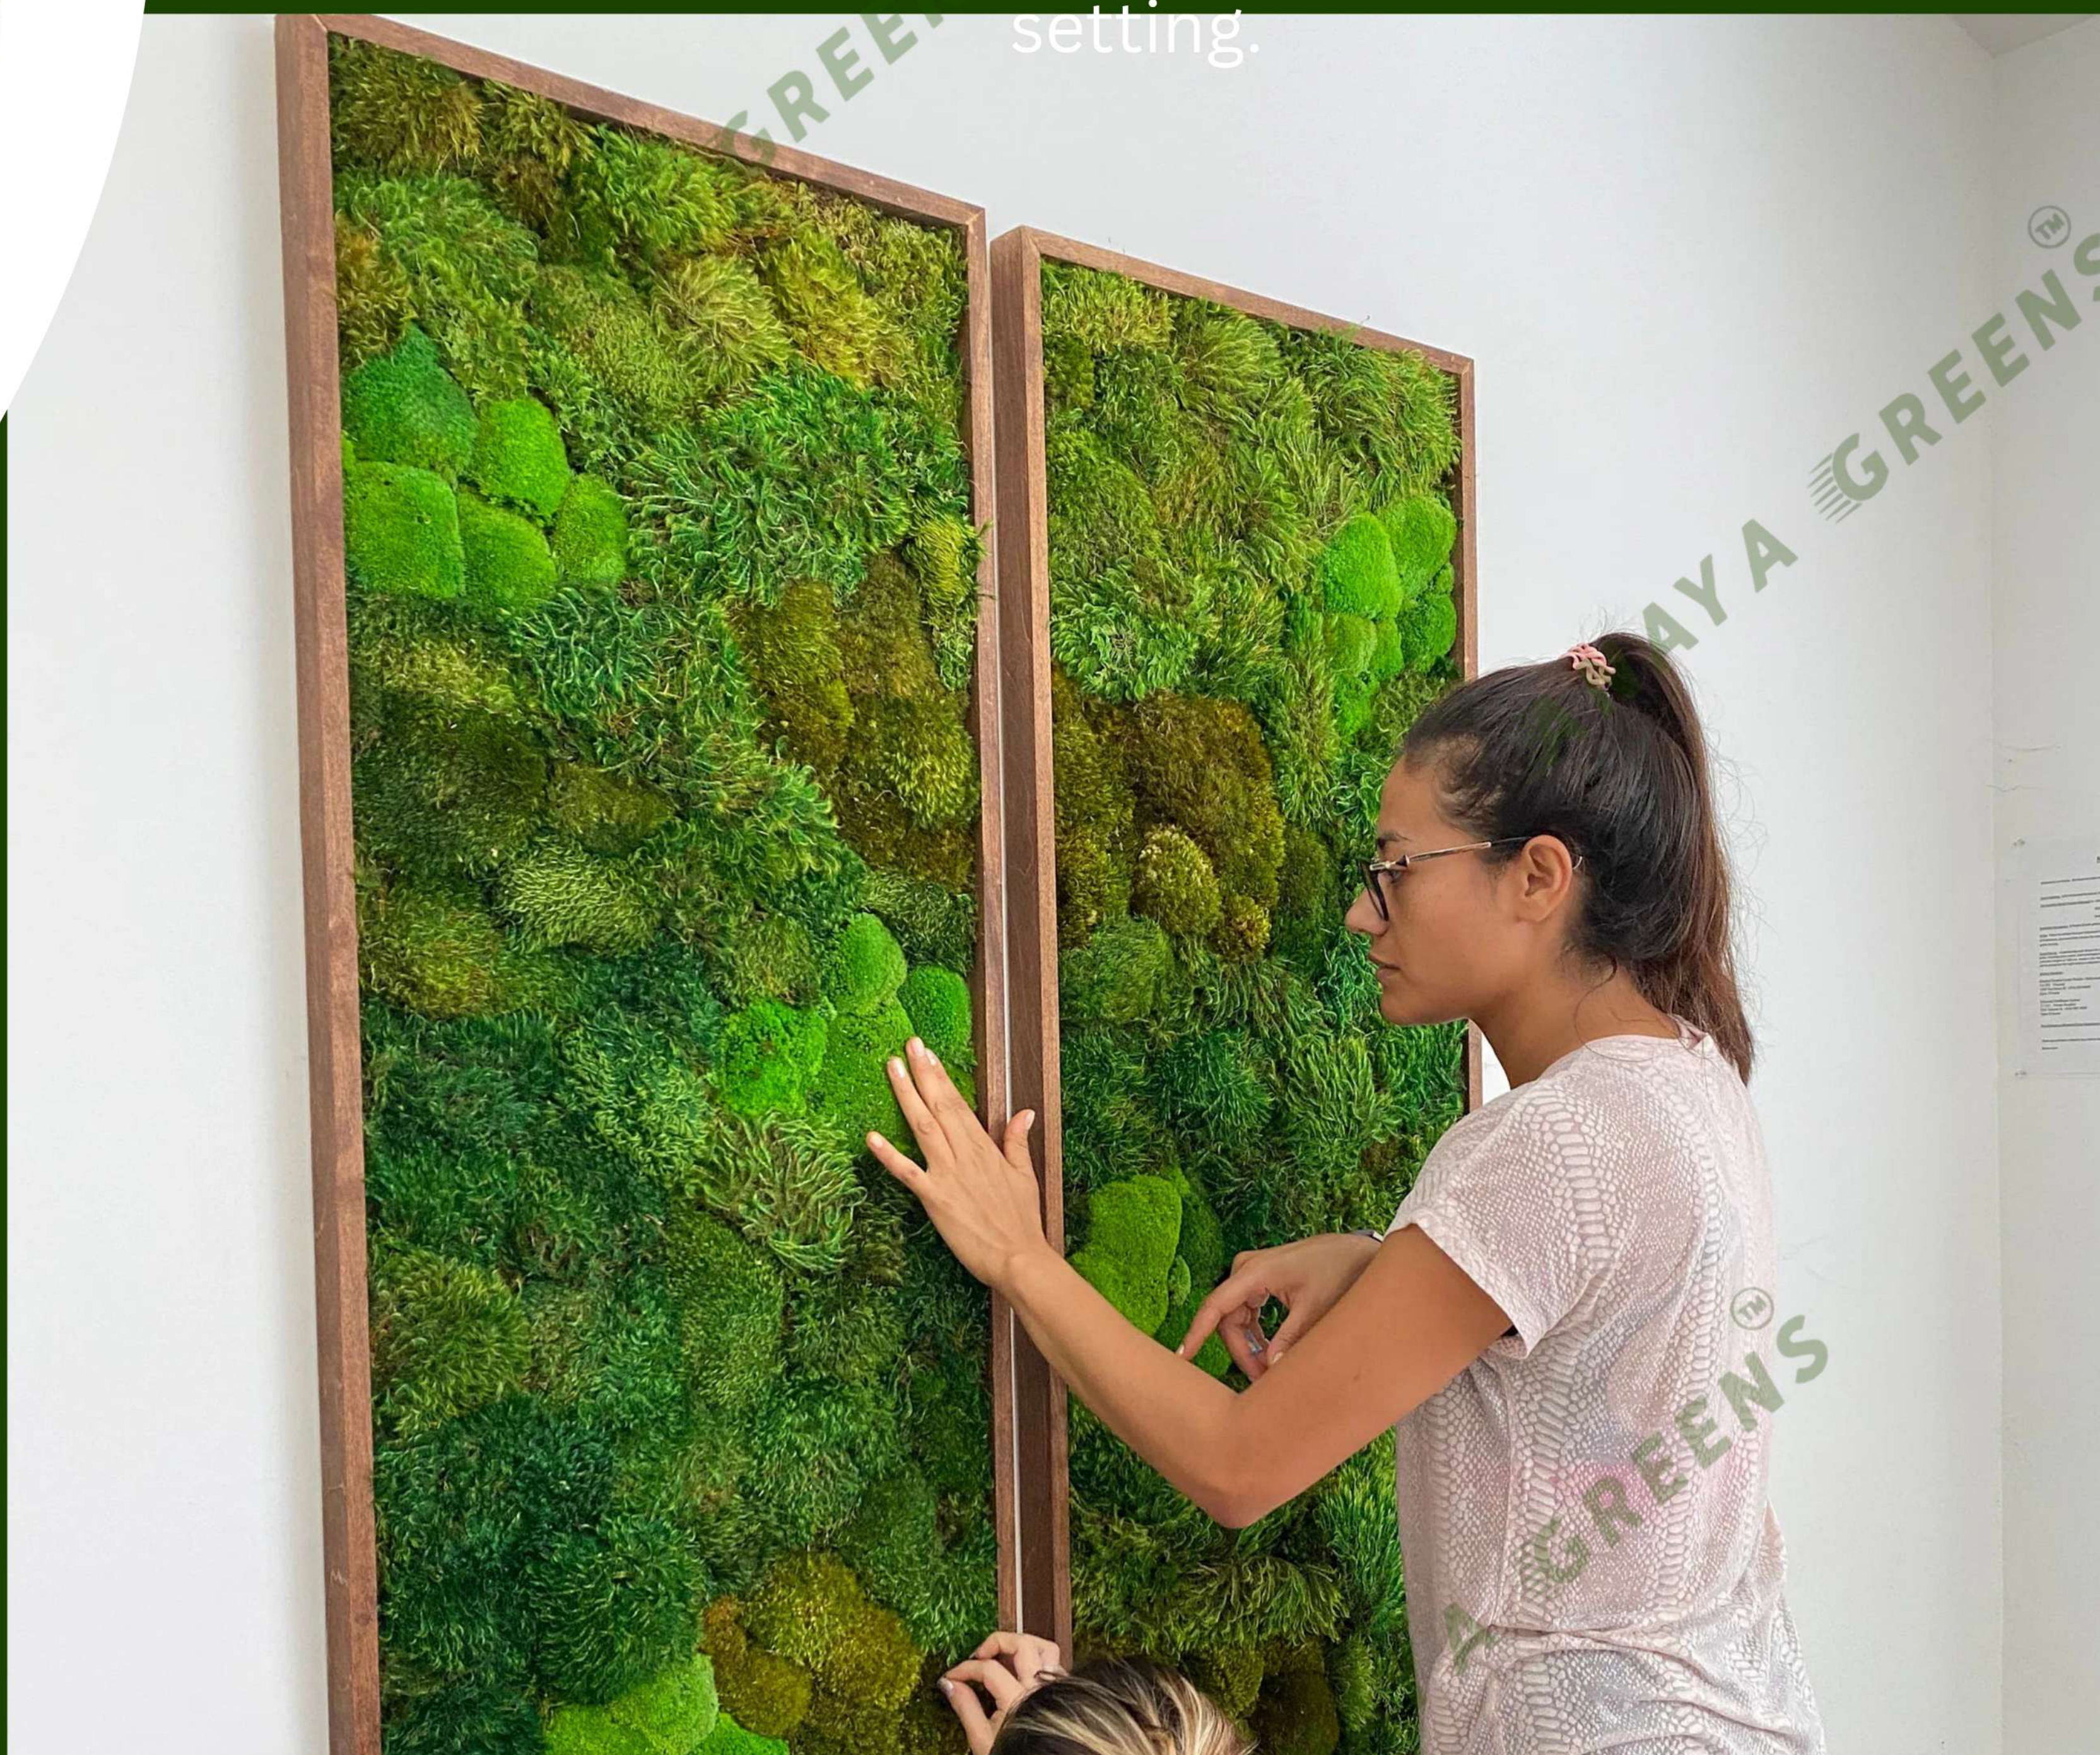

Cushion moss, also known as pole moss, is a preserved variety characterized by its rounded, cushion-like clumps that create a striking 3D effect. It is widely used in vertical gardens, moss art, and biophilic designs, adding depth, texture, and sculptural accents to interiors. With its rich green tones and organic form, cushion moss brings a bold yet calming natural presence to any space.

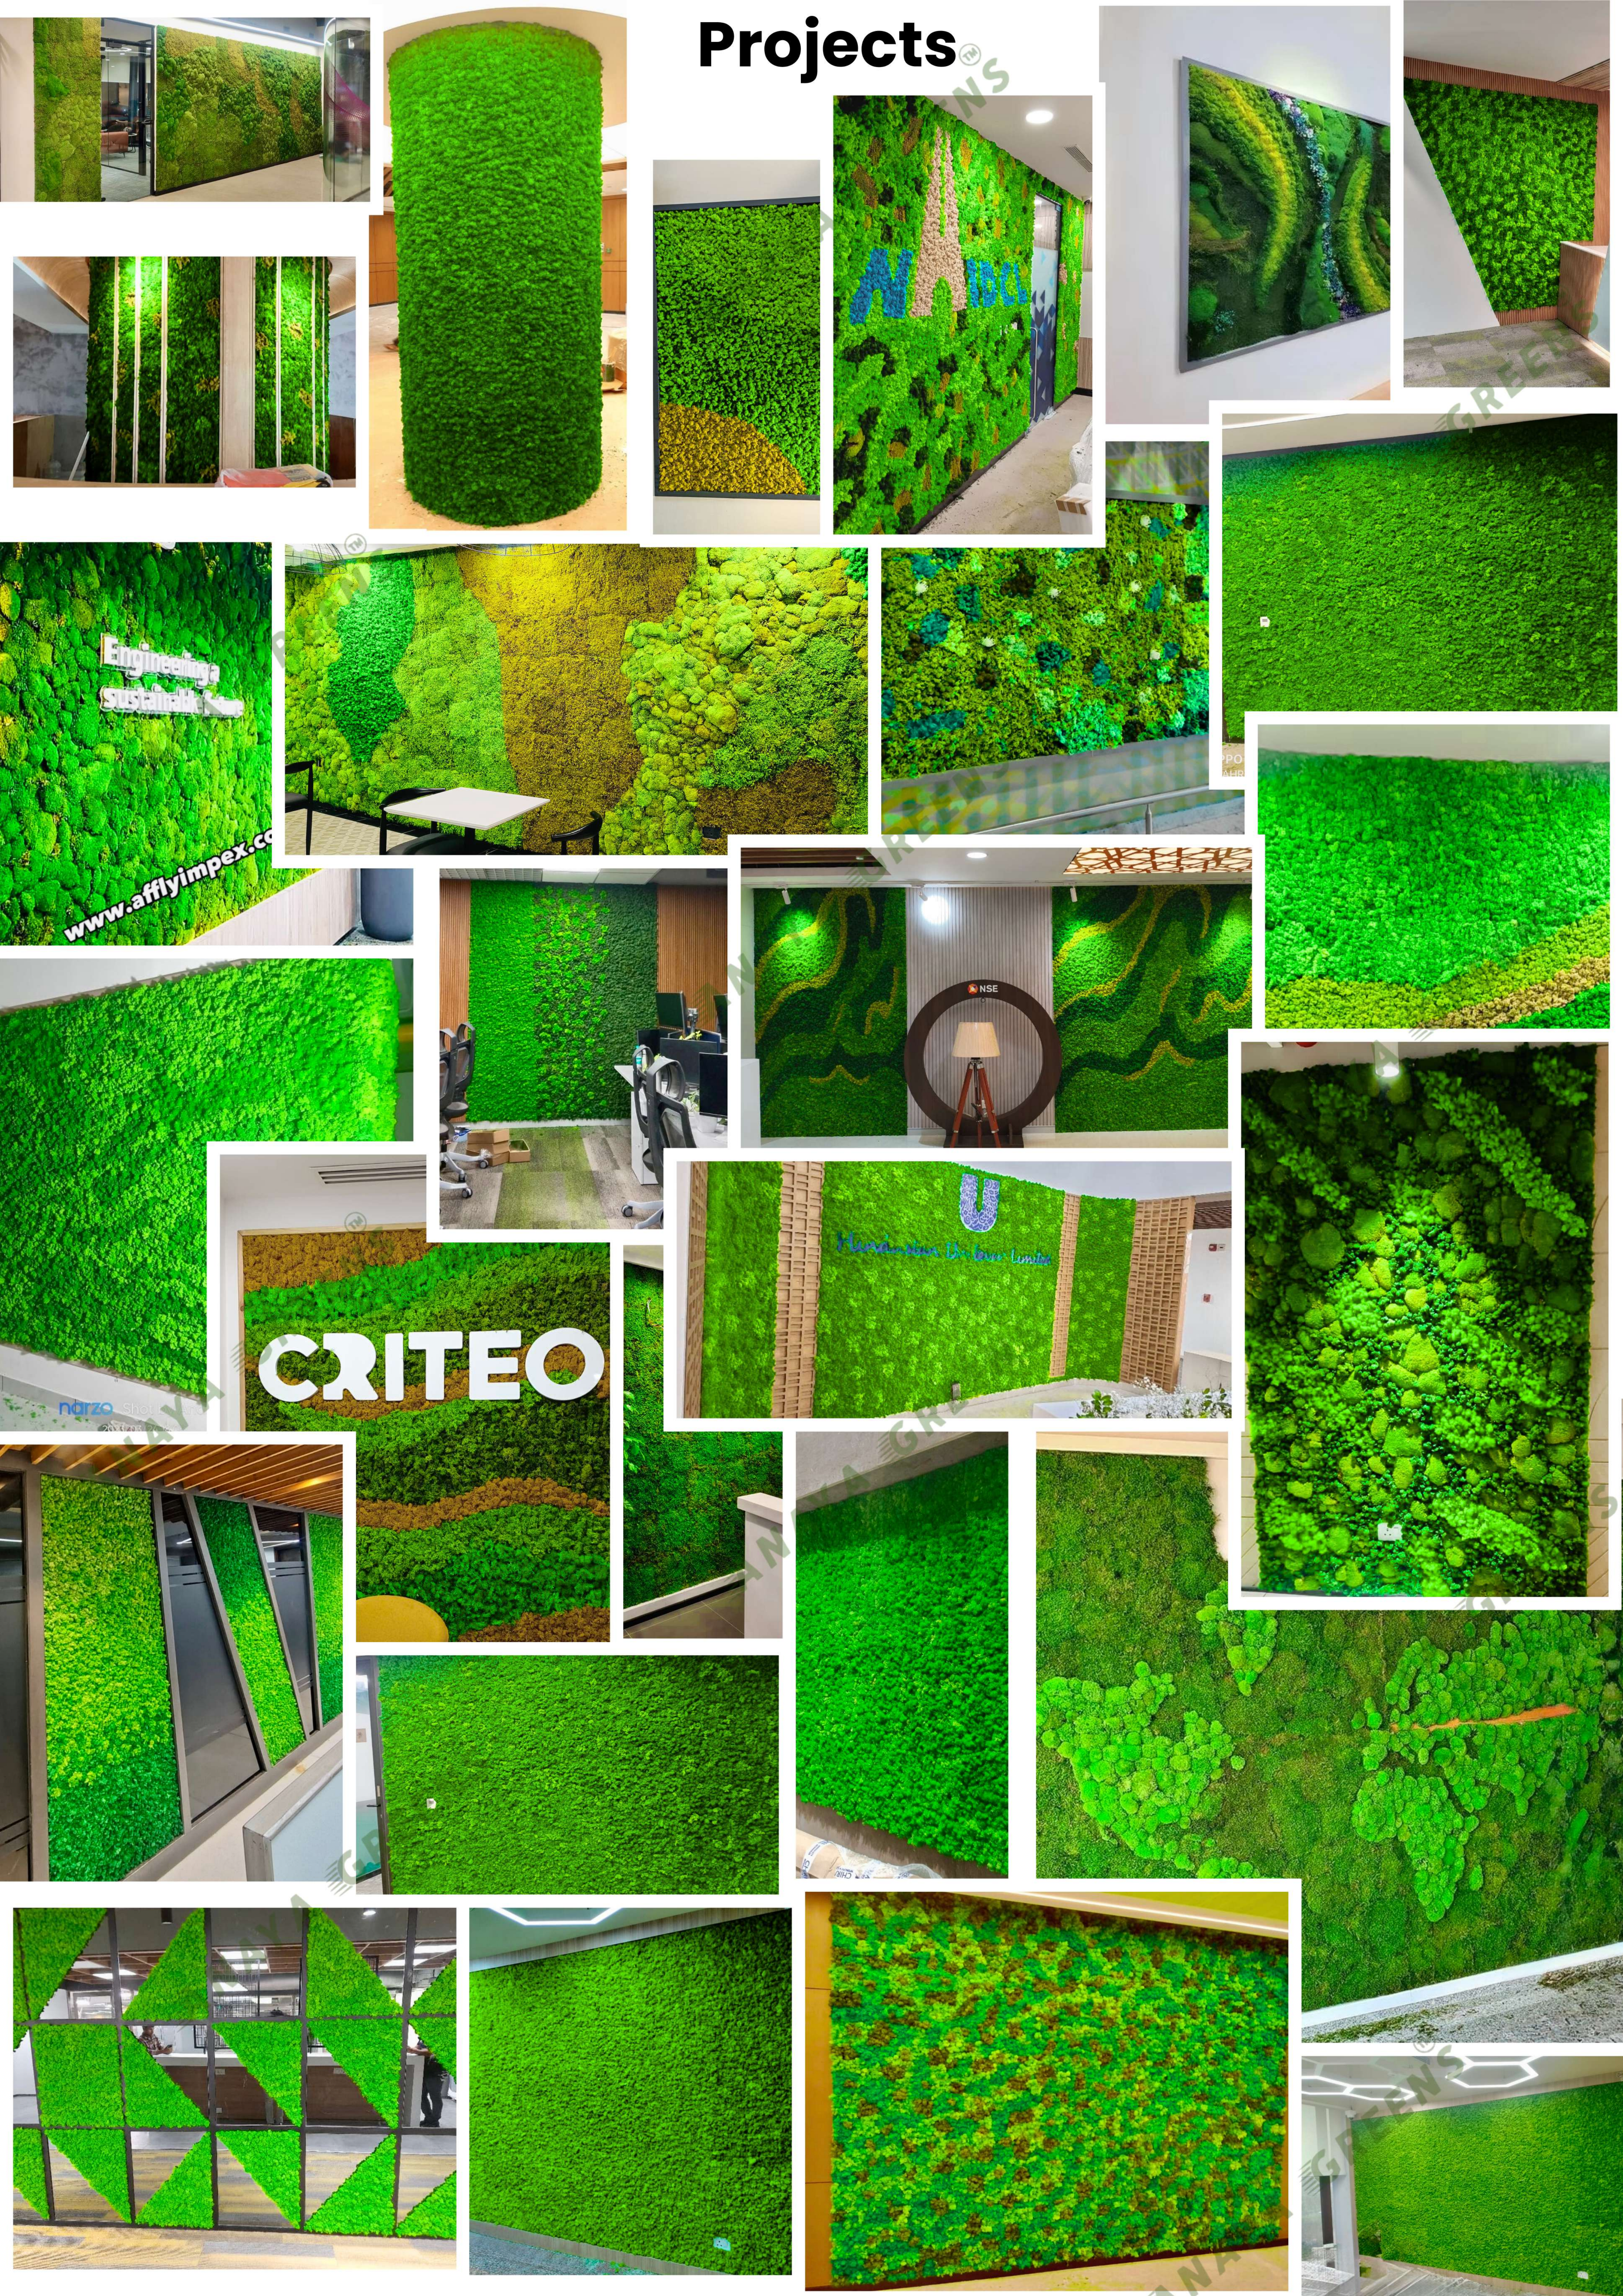

Moss Wall Art

A moss art frame is a decorative piece that features preserved or live moss arranged artistically within a wooden, metal, or acrylic frame. It blends natural textures with modern design, creating a calming, biophilic accent for interiors. It can be customized with different moss types and textures. Their lush, organic look adds depth and serenity to any interior setting.
